

Example use cases for Governments and Central Banks

Example use cases

Existing banknotes

Evaluation of existing banknotes

Design competitions

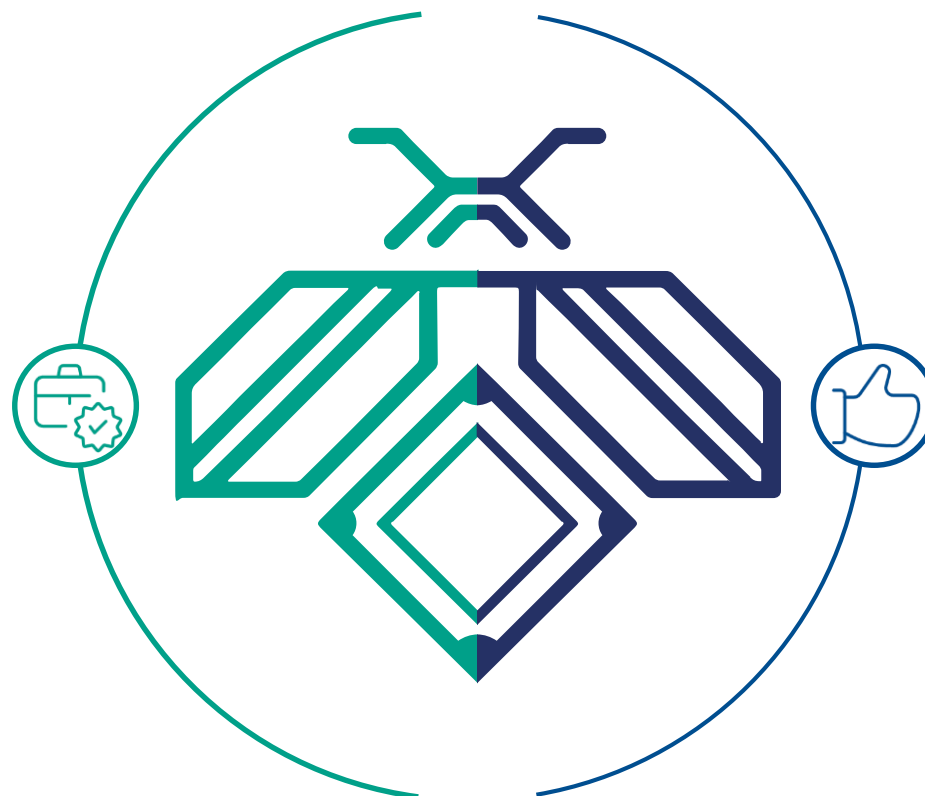

Comparison of the environmental footprint of submitted proposals

Upgrades

Impact of a modification in design or material on the environmental footprint of the note

New banknote series

Improving the environmental footprint when developing a new series

Advantages

Fast

Ecological impact of variants can be modelled and displayed quickly (GUI)

Flexible

Large number of LCA KPIs available

Versatile

LCA data from new feature suppliers or printers can easily be integrated

Informed decisions

Informed decisions are possible when they have the most significant impact (design phase)
